*ParishSOFT Version 4.5.9 Release Notes_last updated March 10, 2020*

ParishSOFT Family Suite

What's New

IQ

New Columns Representing 2020 and 2021 Added to Pledge Summary By Year Group

Previously, the last year listed in the **Pledges > Pledge Summary By Year** group was 2019. To enable reporting throughout 2020 and 2021, we added columns representing those years to the group.

ParishSOFT Version 4.5.9 Release Notes_last updated March 10, 2020
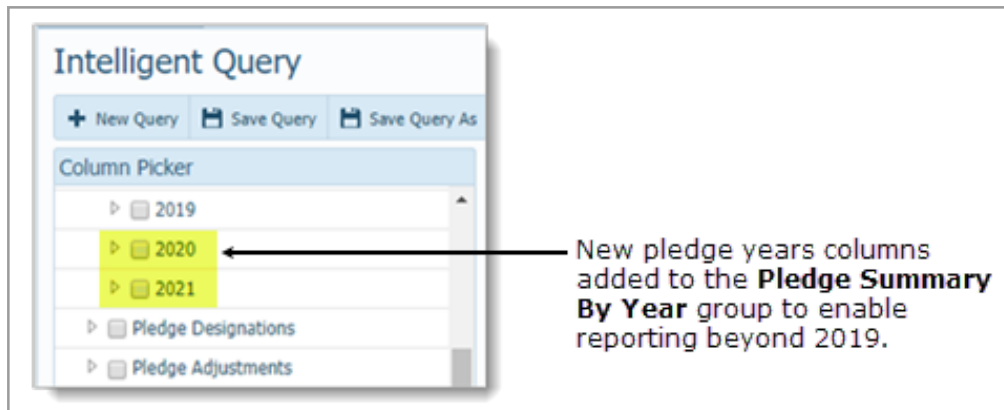

Resolved Issues

Mail Merge

Fixed: Merged Sacrament Certificates Missing Parish Name and City

We resolved an issue that caused the parish name and city name fields on merged sacrament certificates to be blank. The templates were updated to ensure that information in both fields now shows on all sacrament certificates.

Family Directory

Fixed: 'Export to New Family' Process Fails to Transfer Members' Pledge Records

Users reported that the **Export to New Family** button in **Member Details** was not working as expected. If the exported member's record contained pledges, the pledge records were not included in the export. As a result, the **Giving History** summary in the newly created family record included no pledge records for the member.

Fixed: 'Exception' Error Occurs When Sorting on Family DUID or Member DUID Column

Users reported experiencing an 'Exception' error when trying to sort records on the **Family DUID** column (in the **Family List** grid) and the **Member DUID** column (in the **Member List** grid). We fixed this issue.

IQ

Fixed: Queries Referencing Certain Sacrament DUID Columns Return Wrong Results

Previously when users selected the following columns from the **Column Picker**, IQ pulled values from the wrong column, causing queries to report incorrect results:

- **Confirmation** > **Confirmation DUID**

- **Death** > **Death DUID**

- **Eucharist** > **Eucharist DUID**

We fixed this issue.

Diocesan Suite

Resolved Issues

Administration

Fixed: Users Experience an Error When Trying to Export Event Category Lookup Values

We resolved an issue that caused users to experience the following error when trying to export **Event Category** lookup values:

Note

This error occurred only when the All Organizations option was selected from the Organization list.

```
Object references not set to an instance of an object.
```

We resolved this issue.
