What's New in Version 4.9.19

Family Directory

Contact Fields in Member Workgroups Now Contain Member's Information

Per customer request, we replaced information in the **E-Mail**, **Phone**, and **Address** fields in the **Member Workgroups** grid with the member's contact information. Previously, these fields contained contact information for the family.

Resolved Issues in Version 4.9.19

Administration

Fixed: End-Dated Staff Assignments Missing from Assignment History Section in Clergy Report

Previously, end-dated staff assignments were missing from the **Assignment History** section of the **Clergy** report.

Fixed: Unexpected Timeouts Experienced During Exports of Data in Lookup Tables

Users reported experiencing timeouts when trying to export records in the lookup tables on the **Lookup Management** page.

IQ

Fixed: Query Results Sometimes Missing Data for the Pledge Second Acknowledgement Field

Previously, when the **Pledge Secondary Acknowledgment** was combined in a query with any columns selected in the **Families** or **Pledges** group, the query result set contained no **Pledge Secondary Acknowledgment** data.

Fixed: Only Tags Selected on Page 1 of a Multi-Paged Tags List Are Applied to Queries

Previously, after the user opened and saved an existing query, the only tags applied were those selected on Page 1 of a multi-paged Tags list. Tags on subsequent pages of the list were no longer applied.
